Sliding cab-access door

Side door

Hardwood floor

Plywood lining with D-rings

Full-width rear swing-out doors

Walkramps

Bulkheads

- Sliding door access to cab
- Full height dividing walls

Bumpers

- ICC step bumper
- Drop-down second step
- Aluminum

Cargo Control

- Tie-down rings
- Series "E" & "F" track
- Ratchet straps
- Tie bar/slats

Cargo Handling

- Rail and Tuckaway liftgates
- Ramps

Doors

- Double panel swing-out
- Side doors
- Access doors
- Aluminum-clad roll-up doors
- Stainless steel hardware

Floors

- Hardwood
- Composite
- Steel or Aluminum diamond plate

Heat/Cool

- Hot water heater
- Vents

Insulation

- 1"-2" Styrofoam walls/ceiling/air deflector

Ladder Racks

- Roof mounted
- Cat walk
- Removable rear access ladder

Lights

- 3-way switch
- Custom translucent skylights
- Fluorescent
- Spotlights
- Emergency
- LED

Linings

- Full plywood, 3/8", 1/2", 3/4"
- Fiberglass
- Scuff plates
- Slat lining

Safety

- Back-up alarms
- Rear view cameras
- Reflector kits

Shelving

- Adrian Steel®
- Custom

Towing

- Receiver hitches
- Electric brake controller
- Trailer plug receptacle

Toolboxes

- Under body mounted

Windows

- Fixed and sliding

AEROCELL

PROFIT MEASURED IN MILES

Distinctive styling and extraordinary fuel-efficient design make **Aerocell** the smart professional's choice.

UNICELL[®]

THE ONE PIECE FIBERGLASS VAN BODY

AEROCELL

The following **Aerocell** features are continually monitored and updated to ensure **excellence in quality and performance...**

1. Air Deflector

Computer designed for increased fuel efficiency, better highway stability, and reduced wind noise
Inside is a roomy storage shelf or an optional walk-through cab

2. Side Fairings

Creates a smooth transition from cab to body
Lowers drag for fuel efficiency and reduced wind noise

3. One-Piece Fiberglass Skin

No seams. No rivets. No leaks. No rust!
Smooth, glossy surface is the perfect billboard for company graphics
Tougher than .040 aluminum and more puncture resistant than 1/2" plywood

4. Rub Rail

Anodized aluminum with PVC fastener cover strip is scratch resistant
Aerodynamically smooth, clean, and attractive
Provides extra body protection

5. Lower Fairings

Gradually sweeps out from the cab to full body width
Lowers drag for fuel efficiency and reduced wind noise

6. Floor

1-1/2" dense yellow pine is as durable as it is attractive
Polyurethane sealer adds moisture protection

The **Aerocell's aerodynamic shape** not only makes you look good, but **saves you money** too. Here's how:

The reduction in wind drag means fuel savings that, in some cases, could pay for the entire cost of the body

Reduced noise and better handling mean less fatigue and higher productivity for you and your drivers

The tough fiberglass shell resists more impacts for less downtime and any required repairs are cheaper and faster than aluminum or FRP

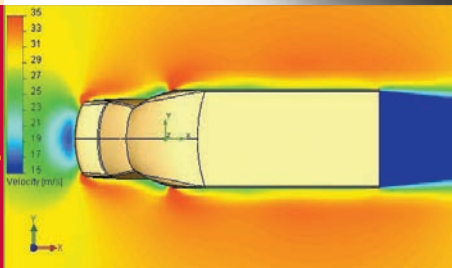

One-piece molded shell means no leaks to cause costly cargo damage

Find out how much money you can save with this model.

Since its introduction, Aerocell users consistently report **fuel savings of 15–20%** compared with conventional van bodies on cutaway chassis. See what you can save by using the fuel savings calculator at www.unicell.com.

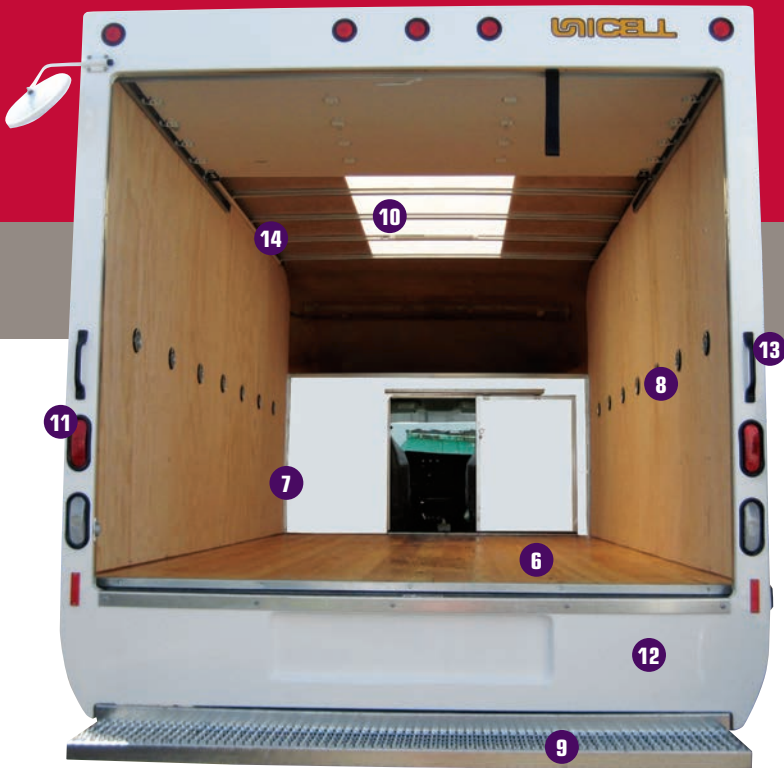

Wind tunnel test model shows smooth air flow over body resulting in low drag.

This translates to more miles per gallon of fuel.

UNICELL®

THE ONE PIECE FIBERGLASS VAN BODY

7. Interior Walls

3/8" plywood lining

Solid front bulkhead wall is standard

Optional access to cab with sliding door is shown here

8. Steel Hoop Posts

18-gauge galvanized steel reinforcing hoops every 24"

9. Safety Step Bumper

The safest bumper in the industry has an aggressive open grate slip-proof surface

Galvanize dipped steel blocks rust and corrosion

Extra deep 11" stepping surface across the full body width

10. Bright Interior

Large, bright built-in skylight is a translucent part of the continuous roof skin

Ceiling-mounted LED light for bright nighttime illumination

11. High Profile LED Taillights

Easily visible from behind

Less prone to damage by feet and cargo

12. Backframe

Four-sided fiberglass rear frame enhances streamlined Aerocell design

Recessed area easily notches out for walkramp installation

13. Grab Handles

Two stainless steel handles assist entry on both sides

14. Weatherproof Wiring

Interior conduit protects wiring from damage and corrosion

Lights are sealed and shockproof

15. Roll-up Rear Door

Premium quality roll-up rear door

E-coated hardware corrosion protection
