

THE UNICELL ADVANTAGE

ONE OF A KIND

Each Unicell van body is created using our patented programmable fiberglass application machine, which enables Unicell to design and build van bodies that are more aerodynamic and better styled than conventional methods and materials allow.

RUGGED

Unicell's unique construction is built to withstand abuse: our fiberglass bodies are tougher and more puncture resistant than .040" aluminum bodies or 1/2" plywood, leading to fewer ugly dents and costly repairs.

SLEEK

Our bodies are manufactured from one-piece molded fiberglass, which means no seams, caulking, or unsightly rivets, just an uninterrupted, smooth, glossy white gel-coat finish. Unicell bodies look great on their own, or provide the perfect canvas for vinyl graphic wraps.

LIGHTWEIGHT

Unicell presents the best van body choice pound for pound: our bodies are as light as any aluminum sheet and post design but considerably stronger, and they are far lighter than any FRP construction.

LONG-LASTING

Unicell bodies are built to last and backed by our 5-year limited warranty. Our fiberglass design makes repairs quicker and easier than for other constructions, which puts you back on the road sooner. Unicell's reputation for quality results in consistently higher value upon resale.

The ProMaster Classicube

The ProMaster Classicube marries RAM's robust ProMaster cutaway chassis with Unicell's most tried and tested product, the Classicube. The Classicube is the original van body that launched Unicell and remains one of Unicell's top sellers. A favorite with daily rental companies and contractors, this traditionally-styled cube van body enjoys all the advantages that Unicell's one-piece fiberglass design has to offer.

Shaped for maximum space, function, and driveability, the ProMaster Classicube leads the way for premium quality and durability.

The Perfect Tool For

DAILY RENTALS

PLUMBERS

CONTRACTORS

SELF-STORAGE

MOBILE REPAIRS
