

THE UNICELL ADVANTAGE

ONE OF A KIND

Each Unicell van body is created using our patented programmable fiberglass application machine, which enables Unicell to design and build van bodies that are more aerodynamic and better styled than conventional methods and materials allow.

RUGGED

Unicell's unique construction is built to withstand abuse: our fiberglass bodies are tougher and more puncture resistant than .040" aluminum bodies or ½" plywood, leading to fewer ugly dents and costly repairs.

SLEEK

Our bodies are manufactured from one-piece molded fiberglass, which means no seams, caulking, or unsightly rivets, just an uninterrupted, smooth, glossy white gel-coat finish. Unicell bodies look great on their own, or provide the perfect canvas for vinyl graphic wraps.

LIGHTWEIGHT

Unicell presents the best van body choice pound for pound: our bodies are as light as any aluminum sheet and post design but considerably stronger, and they are far lighter than any FRP construction.

LONG-LASTING

Unicell bodies are built to last and backed by our 5-year limited warranty. Our fiberglass design makes repairs quicker and easier than for other constructions, which puts you back on the road sooner. Unicell's reputation for quality results in consistently higher value upon resale.

UNICELL

AEROCELL CW

The Aerocell CW

The Aerocell CW features capacity up to 500 cubic feet, and can handle heavy loads up to 3,700 lbs. The cab-width size is slim enough for tight city streets and driveways. With the Aerodynamic design the Aerocell CW will help you save time and money at the pump.

The Perfect Tool For

CARPENTERS

ELECTRICIANS

CONTRACTORS

MUNICIPALITIES

FURNITURE DELIVERY

Standard Features

AERODYNAMICS

- Built-in air deflector with storage
- Full length lower skirt

BULKHEAD

- Standard Sliding bulkhead door in the front wall

BUMPER

- Galvanized Step Bumper

DOOR

- Composite roll-up rear door

EXTERIOR

- Fiberglass Construction
- Gel Coat Surface
- Fiberglass Rear Frame
- Steel Sill Protection
- Anodized Aluminum Rub Rail
- HD steel understructure
- Protective undercoating
- Stainless steel rear grab handles
- LED tail Lights
- Mud Flaps

FLOOR

- 1-3/8" spruce plank floor painted grey
- Wheel boxes or flat floor

INTERIOR

- 3/4" slats on side walls
- Hoop Posts
- Weatherproof wiring system
- 24" LED light with timer switch
- Leak-proof integral skylight
